

**AMENDMENTS TO THE DRAWINGS:**

These drawings replace the previous filed drawings. No new matter has been added.

Figures 3 and 4 have been amended to include additional contour lines; reference numerals an air-oil mixture flow direction.

**REMARKS**

Applicant wishes to thank the Examiner for the detailed remarks. Claims 10 and 20 have been amended. New claims 21-32 are presented. Accordingly, claims 10-15 and 19-32 are pending.

Claims 10-15, 19-20 were rejected under 35 U.S.C. §102(b) as being anticipated by *Poucher* (3531935). Applicant respectfully traverses this rejection. *Poucher* fails to disclose or suggest an intake generally directed in a circumferential direction relative a rotational direction defined about said axis of rotation as recited in amended claim 10.

The Examiner also rejects claim 1 under 35 U.S.C. §102(b) as being anticipated over *Campbell*, however, claim 1 is within the non-elected embodiment.

New claims 21-32 read on the elected embodiment and recite further features of the present invention which are neither disclosed nor suggested by the cited references and are thus properly allowable.

Applicant believes that no additional fees are required; however, should additional fees or extensions of time be required, the Commissioner is authorized to charge Deposit Account No. 50-1482, in the name of Carlson, Gaskey & Olds.

Applicant respectfully submits that this case is in condition for allowance. If the Examiner believes that a teleconference will facilitate moving this case forward to being issued, Applicant's representative can be contacted at the number indicated below.

Respectfully Submitted,  
**CARLSON, GASKEY & OLDS, P.C.**
